

**At Miroculus our mission is to advance science
and improve lives, faster, together.**

Technical Writer

(Contract to permanent)

Miroculus is looking for a collaborative Technical Writer with a strong genomics background to help us produce high-quality content that contributes to the overall success of our novel digital microfluidics platform.

About Miroculus

Miroculus uses proprietary digital microfluidics technology to automate and miniaturize the most complex genomic protocols such as NGS library prep, synthetic biology, cell editing, and combinatorial chemistry, in a compact, user-friendly system. Our vision is to make the most complex protocols easy and accessible to scientists everywhere.

Position Summary:

- Work with internal teams to obtain an in-depth understanding of the product and content requirements
- Produce high-quality content and documentation appropriate for its intended audience
- Write easy-to-understand user guides, online help, and educational materials

(Position Summary, continued)

- Create tutorials to help users understand Miro Technology, our products, and best applications
- Analyze existing and potential content to build a library of materials to use for a diverse set of circumstances (in-person, online, one-on-one, larger audience, etc)
- In collaboration with Product Management & Science teams, manage a scientific content calendar and plan for publications, conferences, etc
- Work cross functionally with science teams to produce peer-reviewed publications, preprints, white papers, and application notes

This position reports to the Marketing Communications lead.

Requirements:

- Advanced degree in science or technical area
- 3 years experience in technical writing about genomics
- Excellent written skills in English
- Understanding of next-generation sequencing
- Experience collaborating with technical and science teams
- Proven working experience in technical writing of scientific documentation
- Ability to deliver high quality content with attention to detail
- Ability to quickly grasp complex technical concepts and make them easily understandable in text and figures
- Energetic, resourceful self-starter with high integrity and the ability to work effectively in a dynamic, entrepreneurial environment

Strong Plus:

- PhD in genomics-related field
- 5+ years experience in technical writing about genomics
- Experience writing specifically about sample library preparation for NGS
- Experience managing translations of technical writing to other languages
- Experience with writing regulatory documents

Location: San Francisco, California (Ideal), but flexible

Applicants should send a cover letter and resume to jobs@miroculus.com
